ADA C.E.R.P.[®]
Continuing Education Recognition Program

SCHOOL OF DENTISTRY
INDIANA UNIVERSITY

The Indiana Dental Association is an ADA CERP Recognized Provider and all classes are approved for continuing education by the Indiana State Board of Dentistry. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. Indiana Dental Association designates this activity for a total of 12 continuing education credits. The IDA Council on Dental Education and Practice and the IU School of Dentistry look forward to receiving your application today to reserve your seat.

2018 ACADEMY SPEAKERS

1 Speaker / 2 Topics with Peter Jacobsen, PhD, DDS

FRIDAY, APRIL 13, 2018

Drugs, Bugs and Dental Products; What to Prescribe!

With all the talk of abuse, addiction and overdoses this session is incredibly timely. A review of the oral medicine of dentistry, antibacterial, antiviral, antifungal drugs, pain medication, the management of aphthous ulcers and fever blisters, and the oral medicine and prophylactic protocols that center around drugs. Decision making relative to dental pharmacology and oral medicine. Information is pertinent and a practical update for all dentists and hygienists.

Live Long and Prosper; Lifestyle Medicine in Dentistry

The afternoon is lighter, more philosophical and more personal, and focuses on the many dimensions of personal health that concern ourselves and our patients. Nutrition, exercise, lab tests that are appropriate for various stages in life. Includes concepts of genetic testing and genomics and their impact on medicine

Tooth Retention vs Tooth Replacement And Factors in Restoring Endodontically Treated Teeth

with Charles Goodacre, DDS, MSD

FRIDAY, NOVEMBER 9, 2018

Course Description

Part 1: Tooth Retention Through Root Canal and/or Periodontal Treatments Versus Tooth Replacement Using Dental Implants Or Fixed Partial Dentures: Which Treatment Is Best? This presentation will discuss the scientific and clinical factors used to determine whether a tooth should be replaced through root canal treatment or be extracted and replaced with a dental implant or a conventional fixed partial denture.

Part 2: The Most Critical Factors Related to the Restoration Of Endodontically Treated Teeth. This presentation will provide answers to the most frequently asked questions regarding the restoration of endodontically treated teeth in light of the contemporary evidence and clinical practice.

Course Learning Objectives

- Identify factors to consider when determining whether to perform root canal and/or periodontal treatment rather than extract a tooth and place an implant or fixed partial denture.
- Compare root canal and dental implants based on biologic

and dentistry, and longevity drugs and how happiness and social connections impact human longevity.

Speaker Profile

Dr. Peter Jacobsen lectures extensively in dental pharmacology and OTC drugs as well as Dental Management of Medically Complex patients. His information is practical and clinically relevant for dentists and dental hygienists. Dr. Jacobsen has a national reputation for being very entertaining, making his presentations lively and enjoyable.

Dr. Jacobsen's Ph.D. is in Comparative Pharmacology and Toxicology and he directed the Oral Medicine Clinic at the University of the Pacific Arthur A. Dugoni School of Dentistry for over 25 years. He is a Diplomate of the American Board of Oral Medicine and past Chairperson of the Council on Dental Therapeutics of the ADA. Eight years in a row he has been named as one of the Leaders in Continuing Education by Dentistry Today magazine. He also received the 1999 Gordon J. Christensen Lecturer Recognition Award. He writes the Dental Drug Booklet, a succinct handout and reference on commonly prescribed dental medications.

factors, associated procedures required, cost and cost-effectiveness, esthetics, and psychosocial factors.

- Determine which endodontically treated teeth need crowns.
- Describe the effect of post and cores upon endodontically treated teeth.
- Identify the design characteristics and clinical procedures that create optimal success when restoring root canal treated teeth with posts and cores

Speaker Profile

Dr. Charles Goodacre received his DDS degree from Loma Linda University and an MSD degree in Prosthodontics and Dental Materials from IUSD. He served as Chair of Prosthodontics at IUSD and Dean of the Loma Linda University School of Dentistry. He is a Diplomate and Past-President of the American Board of Prosthodontics, Past-President of the American College of Prosthodontists, and Past President of the Academy of Prosthodontics. He is a member of the Board of the Foundation for Oral Rehabilitation and Chairs their Education Council. He has over 220 published articles, abstracts, textbooks, and textbook chapters. In addition, he has developed or helped develop 17 online CE courses, 11 electronic education programs, and three eBooks. He currently holds the title of Distinguished Professor and teaches in the Advanced Education Program in Prosthodontics at Loma Linda University and maintains a prosthodontic practice.
